and
Scanner

 precipoint

PreciPoint M8

Dual digital microscope & scanner to accelerate and digitize your workflow

All-in-one device

The M8 serves both as a microscope and a scanner, thus offering completely new possibilities for your workflow.

Page 4

Empower your application

The M8 is the perfect working tool for various applications.

Page 8

Digitize your workflow

View a 15x15mm area within seconds at the highest resolution and image quality. Scan and save your images for future examinations.

Page 5

Cloud and image analysis

Empower your work with cloud solutions, virtual classrooms, and powerful image analysis tools.

Page 10

Live remote control

Control the M8 from anywhere at anytime and simultaneously work with colleagues for second opinions.

Page 6

Made in Germany

PreciPoint products are made and engineered in Germany since 1982.

Page 14

All-in-one device

Accelerate your workflow with the M8 Microscope and Scanner

The M8 is an all-in-one device that offers completely new possibilities for your workflow. The M8 is equipped with three different modes - Live, Instant Scan, and Slide Scan. With these three modes combined, the M8 serves both as a microscope and a scanner. It allows you to directly work on your sample, perform various analyses, and to scan your slides for documentation and future viewing. With its live

remote control capability, the M8 can also be controlled from all over the world. Thanks to its entirely automated hardware, you can work on a sample from anywhere, just as if you were right next to the device.

Let your work get faster, easier, and smarter with the M8 Microscope and Scanner.

Different operating modes tailored to diverse workflows

The Instant Scan mode is a world's first and unique to PreciPoint

Live Mode

The Live Mode offers capabilities of a digital microscope. See the sample live, and zoom through the sample to view different layers and structures in your specimen. The overview image helps you to orientate and navigate.

Instant Scan Mode

The Instant Scan mode is unique to PreciPoint. It gives you a large field of view of a digital scan with the speed of a microscope. Access a 15x15mm area within seconds at high resolution. Perform analyses, look for rare happenings, make annotations, take notes, and then digitize everything. Generate all the reports you need.

Slide Scan Mode

Achieve highest quality scans to digitize your microscope slides. Scanning your selected region of interest (ROI) or whole slide imaging (WSI) is possible, regardless of the sample's thickness, size, and difficulty (e.g. cytology and osteology slides).

Digitize your workflow

Uses of the M8

Research

Speeds research by quickly digitizing images

Ergonomic large touch screen makes long research hours easier

Increases accuracy with annotation tools

High quality slides scans for publications and documentation

Work from home with virtual microscopy

Receive consultations with remote control immediately

Education

Project microscope onto large screen when exploring specimen

Eliminates need for a microscope and slide per student

Provide comprehensive overview in high quality

Annotate samples together live

Scan and share images after class

Work from home, create virtual classrooms

Remote Control

Access samples from anywhere at anytime

Save travel time and shipping costs

Work from home, virtually consult colleagues

Have full control of microscope without directing technician

Save scan wait time

Eliminate on-call traveling physicians

Conferences

Project microscope onto large screen when exploring specimen

Overview image helps you and the audience to orientate

Provide comprehensive overview in high quality

View and analyze live images together

Remote presentations possible

Save travel time and shipping costs

Live remote control

Access the M8 from anywhere at anytime

Users can log into the M8 from anywhere in the world, directly steer the M8 live, offer their opinions remotely, and even participate in consultations from their own offices. These are a few of the many benefits that the M8 offers with its live remote control capabilities. You no longer have to use hefty dual or multi headed microscopes. No more scanning the sample beforehand. No more traveling. No more shipping slides.

Thanks to the fully automated and motorized M8 Microscope & Scanner, users can access and control the M8 from afar and steer the M8 live and instantly. Live remote control is possible on computers, laptops, tablets, and even smart phones. Evolve the way you participate in teaching, conferencing, collaboration, second opinion consultation, and more.

Benefits of live remote control

Access samples from anywhere at anytime

Simultaneous viewing for multiple users for second opinions

Top image quality with large field of view within seconds

View different layers with manual focus plane adjustment

Save travel time and shipping costs

Save scan waiting time

No worries about scanner sensitivity and unfocused images

Easy handling and cleaning when switching between fresh sample slides

1 Elizabeth connects with Fritz

While examining a slide in Houston, she asks her European colleague Fritz for instant consultation.

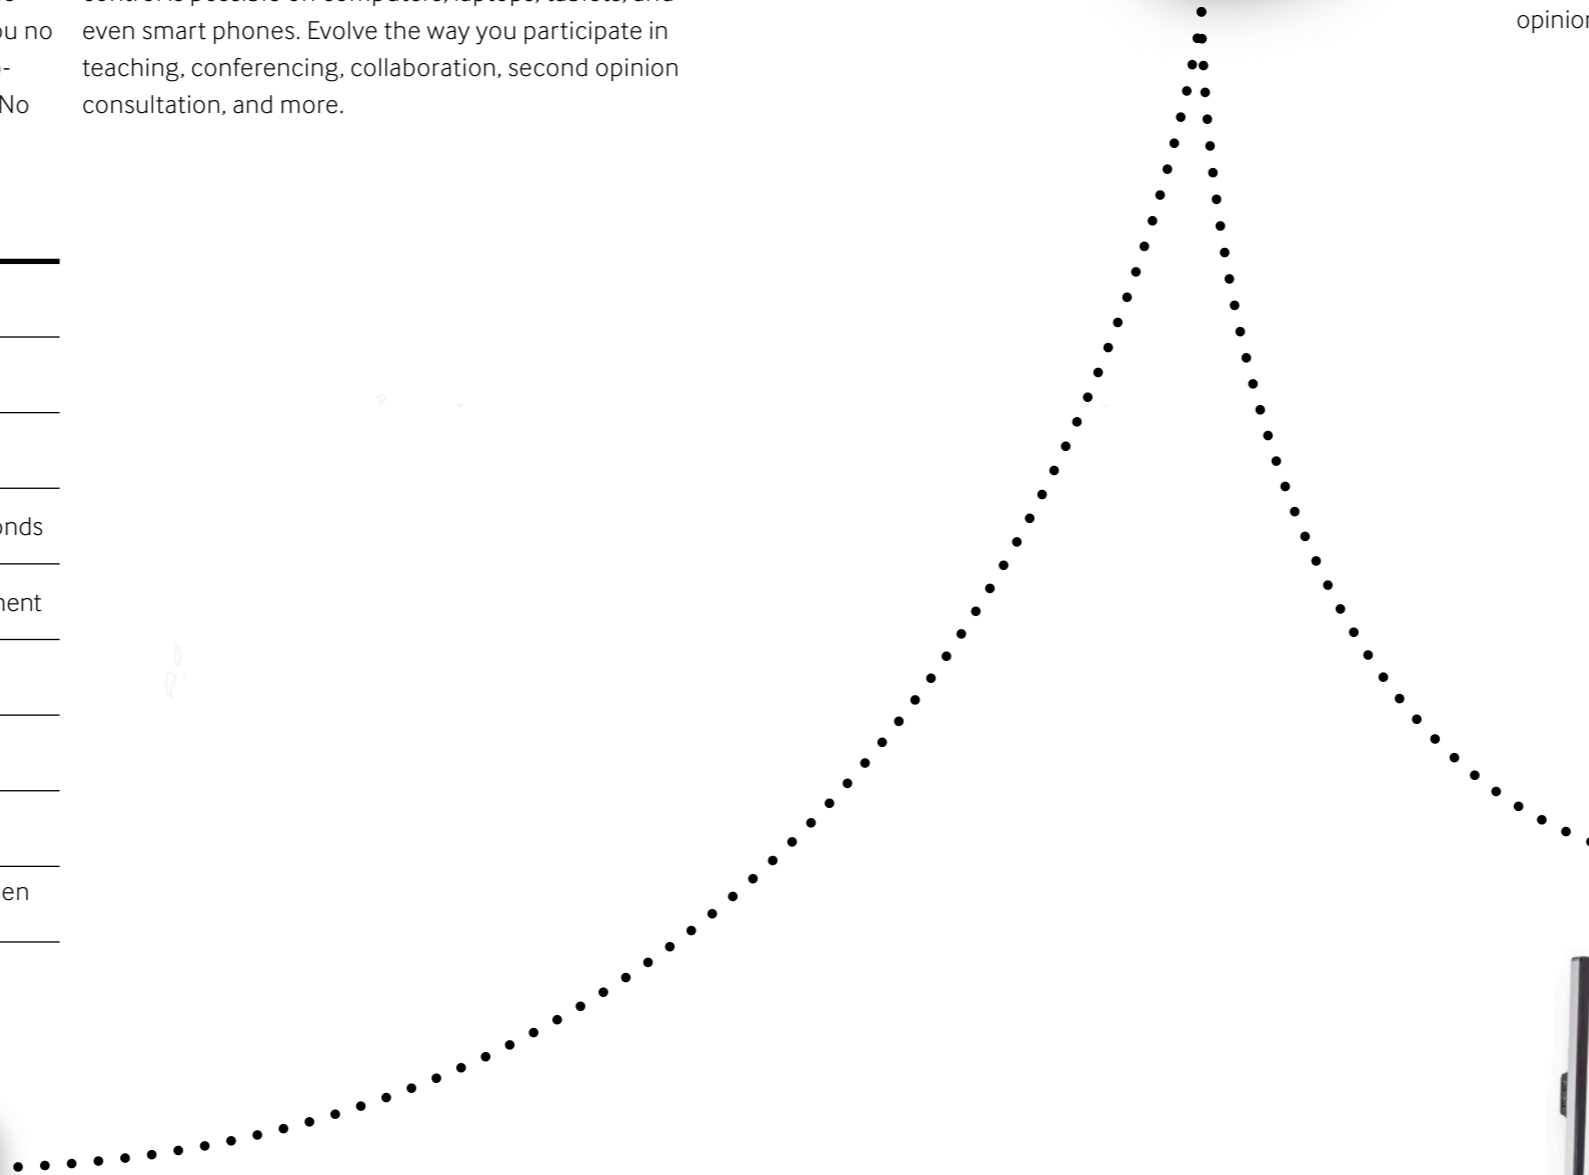

2 Fritz uses live remote control

Fritz personally steers the M8, located more than 9,000 km away. He can instantly analyze the sample. Fritz asks two more specialists for their opinions.

3 Jay and Patrick find the solution

The two specialists in Beijing observe the sample simultaneously with Elizabeth and Fritz. Together as a team, they find the solution.

Empower your application

The M8 is the perfect working tool for various applications

Cloud and image analysis: PreciCloud

Centralize and digitize your workflow on our secure web-based platform – PreciCloud

Visit www.Preci.Cloud to go virtual

1 Work seamlessly from wherever you are

Store, view, share, and access your digital images and slides from anywhere in the world with any device. Our web-based solution works both in desktop and mobile browsers. The platform will provide everything you need to organize your tasks and projects of any size.

2 Set up collaborative workflows & virtual classrooms

The comprehensive tools available on PreciCloud enable you to set up virtual classrooms, collaborative workflows, as well as second opinion consultation. Experts and colleagues can easily interact simultaneously while working in different locations.

3 Secure and scalable

PreciCloud is perfectly adapted for your data: Within our platform, users have the option to control sharing rights and permissions, as well as to have access to logs for documenting or auditing purposes. Our cloud platform is inclusive, secure, and scalable.

4 Full integration to your PreciPoint products

All PreciPoint solutions are connected and fully integrated. You may upload your scans from a PreciPoint microscope and scanner directly onto PreciCloud. Share and access your slides virtually without needing to transfer files manually.

5 Use image analysis to empower your work

PreciPoint provides a collection of powerful and automated analysis tools that use cutting edge image recognition and machine learning algorithms. Pre-analysis is made possible with the help of a deep learning approach for final review by users.

In brief

Technical data and key features of the M8

Microscope and Scanner	Digitization
3 Operating modes tailored to diverse workflows: Live, Instant Scan, and Slide Scan	Whole Slide Imaging or partial digitization
Transmitted light	Different scanning algorithms tailored to different slide qualities
Overview picture Barcode scanning on request	Slide Scan Mode: 15 x 15mm area in 2 min at 20x objective / 40x magnification Instant Scan Mode: large field of view within seconds at high resolution
Seamless zoom: Live-Stitching makes objective changes unnecessary	Scanning resolution: 20x, 0.75 NA: 0.55 μm / px; 40x, 0.95 NA: 0.28 μm / px
Supported objectives: 20x, 40x, 60x air	Live remote control
Easy, intuitive, and ergonomic handling via touch screen	Cloud, Image Analysis, and Computer
Annotation, measurement, counting tools	Operating software "MicroPoint" included Viewer software "ViewPoint" included*
Automated x-y-stage 25 x 75mm (2 slides) or 50 x 75mm (1 slide)	Cloud and image analysis
Automated Z-axis; Z-stacking	Various computers recommended and approved by PreciPoint
45cm x 40cm x 30cm; 25kg Developed and Made in Germany	Connection from computer to M8: min. USB 3.0 Various output formats: PNG, JPEG, TIFF, VMIC, XLS, and many more

*free download of ViewPoint on www.PreciPoint.com

PreciPoint – Made in Germany

German Engineering at its best

Since 1982, we have made more than 15,000 installations of diverse systems and devices all over the globe. They are produced in Germany and our solutions are made to the highest German engineering standards. Our key competence is the digitization of measurement and automation technology in the field of microscopy and micropositioning systems. The spectrum of our offers ranges from smart microscopes to automated testing systems with custom-made software and from microspectroscopy to x-y-stages.

Since 2015, we proudly present the M8, a truly smart microscope that disrupts the traditional methods of microscopy use. The M8 is most probably the smartest microscope and scanner in the world. It integrates all our expertise and experience collected over the past decades. Our global sales success proves that users worldwide embrace and appreciate the opportunities that the M8 offers.

Contact us to learn more about the future of microscopy at sales@precipoint.de or +49 (0) 8161 976 979-0. Let's digitize and accelerate your workflow together.

Discover the future of microscopy.
